9800 E Talking Stick Way

Scottsdale, AZ 85256

Main: 480-850-7777

Reservations: 866-877-9897

NDEDIC provides a forum wherein our diverse membership can develop business solutions and guidance for promoting information exchanges related to dental care. Some of those solutions may include use of ANSI-accredited standards. Through education and collaboration with industry organizations, our members will develop these solutions to improve system security, patient privacy and outcomes, while reducing costs in the healthcare system.

NDEDIC Vision

To be the model forum for the dental community that empowers its members to enhance the quality and efficiency of the healthcare system through the creation and promotion of information technology solutions for the ultimate benefit of the patient and dental industry stakeholders.

For many years, NDEDIC has been educating the dental industry and its various stakeholder groups on the value of electronic exchange of dental information, including increased efficiency, speed and accuracy of dental claims, reduced administrative costs, and ultimately, better patient service.

In recent years, NDEDIC, through the efforts of its members, has made significant progress toward standardizing the electronic exchange of dental eligibility and claims information and maximizing the use of existing electronic transactions.

Recent and ongoing efforts include:

- Identifying the top 56 dental eligibility and benefit questions providers ask payers to address on behalf of their patients through efficient electronic transactions (270 request and payers' 271 response)
- Promoting payer adoption of the top 56 questions in the electronic data exchange of information to minimize time consuming and expensive phone calls between dental offices and insurance companies.
- Recognizing payers who are addressing the top 56 questions in their electronic transaction processing
- Providing implementation guidance to help the dental community take full advantage of the HIPAA compliance-based, healthcare industry standard 835 electronic transaction for sending an electronic explanation of claims payment (Electronic Remittance Advice). This includes establishing a standard set of transaction codes (Claim Adjustment Reason Codes - CARCS and Remittance Advice Remark Codes - RARCS) that meet dental needs.
